

A hand-drawn diagram showing a long, horizontal, rounded rectangle. On the right side of the rectangle, there is a small circle with an 'X' inside. To the right of the rectangle, there is another circle with an 'X' inside. Below the rectangle, there are two rows of four squares each, arranged in a 2x4 grid.

The four diagrams illustrate the step-by-step construction of a car's front view:

- Diagram 1:** A simple rectangle with a horizontal line across the middle and two diagonal lines forming an 'X' from the corners of the top half to the corners of the bottom half.
- Diagram 2:** The rectangle is slightly rounded at the corners. The horizontal line is now curved to follow the shape of the windshield.
- Diagram 3:** The front end is defined by two horizontal lines at the bottom. The 'X' lines are extended downwards to meet these lines.
- Diagram 4:** The final drawing, showing a complete car with a rounded front end, a curved windshield, and a defined roofline.

A hand-drawn diagram of a cell. It is an oval shape with a thick border. Inside, there is a large, clear, oval-shaped vacuole on the left side. In the center, there is a small, dark, circular nucleus with a cross inside it. To the right of the nucleus, there is another small, dark, circular structure, also with a cross inside it.

A hand-drawn diagram of a button. It consists of a rounded rectangle with the word "BUTTON" written inside in capital letters. Above the rectangle are three horizontal lines of varying lengths, representing a label or text area. To the left of the rectangle is a small square with an 'X' inside, and to the right is a small circle with an 'X' inside.

DETAIL

A hand-drawn diagram of a cell. At the top, there is a label 'प्लास्मोलेमा' (Plasma Membrane) with an arrow pointing to the outer boundary. Below this, there are several horizontal lines representing internal structures. In the center, there is a large, irregularly shaped structure labeled 'न्यूक्लियस' (Nucleus). To the right of the nucleus, there is a smaller, rectangular structure labeled 'गोल्जी' (Golgi). Below the nucleus, there are two rectangular structures labeled 'लिसोसोम' (Lysosome). At the bottom, there is a label 'साइटोप्लाज्म' (Cytoplasm) with an arrow pointing to the area between the nucleus and the plasma membrane.
